

Set a Brite™ “Green” Example

Specify Super Erecta Brite™

Visually Attractive

Environmentally Responsible

If you've been specifying Super Erecta® or Super Adjustable 2 Super Erecta™ shelving because of its timeless design, high quality construction and attractive finish, now you have a "green" alternative - Super Erecta and Super Adjustable 2 Super Erecta™ Brite™. The same great Genuine Metro product you've come to depend on, with an environmentally-friendly protective finish that's as brilliant as chrome.

Metro's "Super Brite Process" was developed to reduce by-products entering the waste stream that hold potential risks to the environment, and address long-range standards for clean air and water.

With its extra-thick, high-gloss zinc plating and state-of-the-art brightening process, Metro's Brite finish has the look of chrome and is an environmentally responsible and economical alternative to chrome shelving.

When its time to specify, there's no need to compromise. Give your clients the bright, clean look of chrome and help protect our planet too.

Super Erecta and Super Adjustable 2 Super Erecta Brite. Another shining example of Metro's commitment to innovation and our environment - today and tomorrow. For more information contact your Metro representative, visit www.metro.com or call 1-800-433-2232.

We care about our backyard - and yours.
