

We're just touching the surface on a better way to dry.

PROTECTION THAT LIVES ON
MICROBAN

Trays provide locations for barcode labels allowing the tray to be identified easily.

Rest your products on a superior design for efficiency, ergonomics, and cleanability.

Metro's thoughtfully designed WavDri™ drying tray is designed to maximize efficiency with superior airflow and a thorough rotation process. The patent pending clamshell rotation process allows you to quickly rotate the buds. Features such as Microban antimicrobial protection make this lightweight polymer drying tray ideal for agribusiness processing.

Increased Air Flow. Reduced Contact.

The undulated surface of a WavDri™ tray helps increase airflow, reduce surface contact with product and improves efficiency. Inclusion of Microban® antimicrobial in the WavDri™ tray helps mitigate the proliferation of bacteria and mold.

A faster, thorough rotation process.

Cover  Flip

Quickly and consistently rotate & document the rotation process vs. manual rotation.

Metro's patent pending clamshell rotation process for efficiency allows for the protection of delicate product, as well as, complete rotation for superior drying.

Quickly identify if the trays have been rotated using indicator plaques, which alternates from red to white for a consistent documented rotation process. (Indicator plaques sold separately)

Use with Metro's RE3S wire drying rack for optimal airflow and minimal tray contact. 

Clean & Safe.

Quickly rotate and identify.

WavDri™ trays are designed to be machine washable in temperatures up to 212°F. Trays are manufactured from food-safe polypropylene and are resistant to most cleaning agents including isopropyl alcohol, hydrogen peroxide, and bleach solutions.

Contains Microban® antimicrobial that inhibits the proliferation of bacteria and mold.

Dishwasher Safe
Withstands temperatures up to
212°F

 Trays nest for storage.

Available dolly to store and transport efficiently and safely.
